SUMMARY

Computer Science Engineering student with strong foundations in full-stack web development, data structures, and AI-driven applications. Experienced in building scalable applications with authentication, payment integration, and API-based architectures. Seeking an entry-level software development role to apply problem-solving and software engineering skills to real-world systems

EDUCATION

Gyan Ganga Institute of Technology and Science Jabalpur, Madhya Pradesh

B.Tech – Computer Science Engineering
2023 – 2027

Maharishi Vidhya Mandir (CBSE) Vijay Nagar, Jabalpur, Madhya Pradesh

Senior Secondary
2022 – 2023
Percentage – 76%

CERTIFICATIONS

- Oracle Certified Java Programming
- Cisco Python Certification [link](#)
- AWS Cloud Fundamentals [link](#)
- Oracle SQL Certification
- AWS Generative AI Fundamentals [link](#)

ACHIEVEMENTS

- Solved 400+ Data Structures & Algorithms problems on LeetCode
- Frequent participant in coding contests and hackathons

LANGUAGES

Hindi (Native),
English (Professional Working Proficiency)

TECHNICAL SKILLS

- Languages: Java, JavaScript, TypeScript, SQL, HTML, CSS
- Frontend: React.js, Next.js, Tailwind CSS, Responsive
- Backend: Node.js, Express.js, REST APIs
- Database: MongoDB, SQL
- AI & API Integration: OpenAI API, ImageKit API, Streaming Responses
- Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, IntelliJ IDEA, MySQL Workbench, MongoDB Atlas
- Core CS: Data Structures & Algorithms, OOP, DBMS

PROJECTS

QuickGPT – AI Chatbot SaaS Platform ([GitHub: QuickGPT Link](#))

- Developed a full-stack AI chatbot platform supporting multi-user authenticated conversations using JWT-based authorization.
- Integrated OpenAI API for intelligent responses and ImageKit API for AI-powered image generation.
- Implemented real-time streaming responses with typing animation and auto-scroll for ChatGPT-like user experience.
- Designed a credit-based usage system with dynamic deduction (1 credit/chat, 2 credits/image) and real-time UI updates.
- Integrated Stripe payment gateway for secure credit purchases.
- Built persistent chat history storage using MongoDB Atlas with support for search and conversation continuation.
- Enforced role-based authorization preventing unauthorized access to other users' data.
- Implemented robust validation and error handling, including toast notifications and fallback responses.

Wanderlust – Airbnb-Style Hotel Listing Platform ([GitHub](#))

- Developed a full-stack web application enabling users to list, browse, and review hotel accommodations.
- Implemented secure authentication and authorization using Passport.js with protected routes for multi-user access.
- Designed dynamic server-rendered UI using EJS templating engine for efficient content delivery.
- Built a review and rating system allowing users to submit star ratings and comments on listings.
- Implemented search and filtering functionality to enhance user experience and listing discovery.
- Integrated Cloudinary for scalable image upload and cloud-based storage of hotel listing photos.
- Applied Joi validation along with client-side validation to ensure secure and reliable data handling.
- Modeled and managed database operations using MongoDB and Mongoose ODM for efficient CRUD functionality.
